

Here are some highlights of what **YOU** have helped achieve over the 2019-2020 fiscal year!

Children participated in 3,852 creative therapies sessions!

92% of the children in care met their treatment goals!

WORDS FROM FORMER CHILD IN CARE

"About 10 years ago, Hoffman Homes became the first step in the long journey that is my mental health recovery. I was 15 and my self injuries and suicidal behaviors led me to a point where I could no longer stay safe at home. Hoffman, three hours from home, became a sanctuary where I could start the healing process. I had my struggles here, but staff never gave up on me. I utilized the creative therapies as well as individual, and was given the tools to thrive educationally. I was involved in the work program in the dining hall, which gave me my first chance to learn work ethics. I left Hoffman a year later in a place of recovery. My journey of healing did not end there, but I do not know where I would be without the support and unconditional care I received here. I am now 25, one year recovered of self harm, and an advocate for those with mental health disabilities."

Thank you for helping **99** children last year!
